

Corporate membership **Standard (3 members)**

Network

Be featured in IIR communications (newsletters, social media, events)

Members, their contributions, and their news can be featured upon request in IIR communication channels and conferences, targeting all members and the general public interested in refrigeration and heat pump technologies.

Join the IIR's global network of industry leaders, researchers, experts and policymakers

Members can connect with all other members and leverage the IIR network. IIR members include industry leaders, researchers, experts, policymakers from all over the world.

Join the IIR's 12 Working Groups

IIR Working Groups gather specialists to collaborate by organising conferences and workshops, writing publications and providing recommendations on specific topics related to current issues. Members of working groups are experts, professionals, engineers and/or technicians from industries, universities and research-centres active in the field.

See the dedicated IIR webpage (<https://iifir.org/en/iir-working-groups>).

Be prioritised for IIR event sponsorship, speaking opportunities, participation and organisation

Corporate members have priority to be invited to IIR organised events e.g. workshops, webinars, conferences, dialogues.

They can also be featured as a key speakers on their topic of expertise. Corporate members can sponsor IIR events and multilateral side events demonstrating leadership in the field and their support to IIR's mission.

Connect with leading laboratories and expert centres through dedicated matchmaking and access to the IIR Directories

The IIR is actively exploring and identifying collaboration opportunities and connecting the laboratories and research centres of the IIR network with stakeholders seeking expertise, services and research for innovation. Interested members centres are included in IIR Directories.

Directory: IIR directories are an essential tool for all those involved in the refrigeration sector: they allow users to locate and contact international experts in the various fields of refrigeration as well as laboratories conducting refrigeration-related research. A new Member Directory is in place to expand the access to our network.

The IIR expertise directory is made up of an international network of 390+ IIR Commission members recognised as experts by their peers. The laboratory directory lists 300+ laboratories in over 50 countries.

Science

Access IJR Papers and Conference Proceedings via FRIDOC

Free and unlimited access to all 6,800+ articles of the International Journal of Refrigeration (IJR), all 14,500+ IIR conference papers, all 170+ digitised proceedings of IIR conferences via the IIR's online database FRIDOC.

FRIDOC: the world's most comprehensive database dedicated to refrigeration information with 110,000+ indexed documents.

IJR: The International Journal of Refrigeration (IJR) in collaboration with Elsevier, issued monthly, includes original research papers, review articles, papers presented at IIR conferences and short reports describing preliminary results and experimental details, and Letters to the Editor on recent areas of discussion and controversy.

Enjoy 25% off IIR books and 15% off publications from IIR partners

Members have 25% discounts on all IIR books, 50% discount on printed versions of IIR conferences' proceedings and 15% discount on all publications by IIR partners available on the IIR's online database FRIDOC.

Be nominated as author and reviewer of IIR publications

Members are eligible to be nominated as authors of IIR publications of direct interest and relevant expertise. These can be technical and policy briefs, as well as white papers. IIR publications are cited internationally by the scientific, international cooperation, policy and industrial communities.

Benefit from reduced registration fees for the IIR Congress and conferences

Members are eligible to special discounts on all IIR Conferences and the International Congress of Refrigeration (ICR) registration fees equivalent amounting to up to a 1-year membership fee.

Receive priority invitations to participate, co-organise and speak in webinars/training sessions

Members have priority to be invited to participate, co-organise and/or speak in IIR webinars/training sessions dedicated to designers, logistics, managers, operators and technicians.

Subscribe to topic-specific or customised FRIDOC alerts

Members can subscribe to topic-specific or customisable alerts from the FRIDOC database. Setting up these alerts is simple, and allows members to stay updated on the latest news and scientific information relevant to each individual.

Data

Access statistics/scenarios/datasets for refrigeration applications

Members gain access to IIR statistics/scenarios/datasets for all refrigeration applications, available for download for their use in research models and publications.

Policy

Receive priority invitations to webinars on new national and regional policies and regulations

Members have priority to be invited and/or speak at webinars related to new policies and regulations on refrigeration and heat pumps in different countries/regions. Members can stay updated on policy progress and changes by engaging and discussing with the different stakeholders in the field.

Action

Be prioritised for expert participation in IIR cooperation projects

Members are prioritised when the IIR invites experts to develop proposals and implement projects.

IIR cooperation projects: The IIR partners with other organisations on technical assistance and cooperation projects to promote sustainable refrigeration technologies, improve access to refrigeration, build capacities and support stakeholders in achieving their refrigeration-related targets. Funded at the European and international levels, these projects support the IIR's core mission of developing knowledge and fostering collaboration on refrigeration and heat pump technologies to improve the quality of life in a cost-effective and environmentally sustainable way. See the examples of the SophiA4Africa or AGRI-COOL projects.

Priority to be invited as a partner in R&D consortium projects

Members are prioritised when the IIR invites experts for Research and Development (R&D) projects, e.g. applied research, technology demonstrations and similar consortium projects.

R&D consortium: The IIR is a key consortium partner in many research projects. Funded at national, European and international levels, these projects support the IIR's core mission of developing knowledge and fostering collaboration on refrigeration and heat pump technologies to improve the quality of life in a cost-effective and environmentally sustainable way. See the examples of the ENOUGH and BETTED projects.

Standard

€631 incl. VAT/year
(organisation located in an IIR member country)

€775 incl. VAT/year (standard rate)
